

## ALCONIX Establishes New Base in India and Forms Joint Venture with CHIYODA Air-con Parts Co., Ltd.

**Advancing the Business in India—Positioned as the Group’s Priority Strategic Area—  
through the Manufacture and Sale of Air-Conditioning Valve Products**

ALCONIX CORPORATION (Chiyoda-ku, Tokyo; Hiroshi Teshirogi, Representative Director, President and CEO; hereinafter “ALCONIX”) has decided to establish a local subsidiary and a joint venture company in India, with the aim of accelerating the expansion of the ALCONIX Group’s business in the country. The joint venture, formed in collaboration with Chiyoda Air-con Parts Co., Ltd. (Takayasu Kitayama, Representative Director and President), a leading company engaged in the development, design, and manufacturing of functional components for air-conditioning and refrigeration equipment, will develop, manufacture, and sell parts for air-conditioning and refrigeration equipment, primarily service valves for residential air conditioners (room air conditioners; hereinafter “RA”) in India.

### ■Background of Establishment

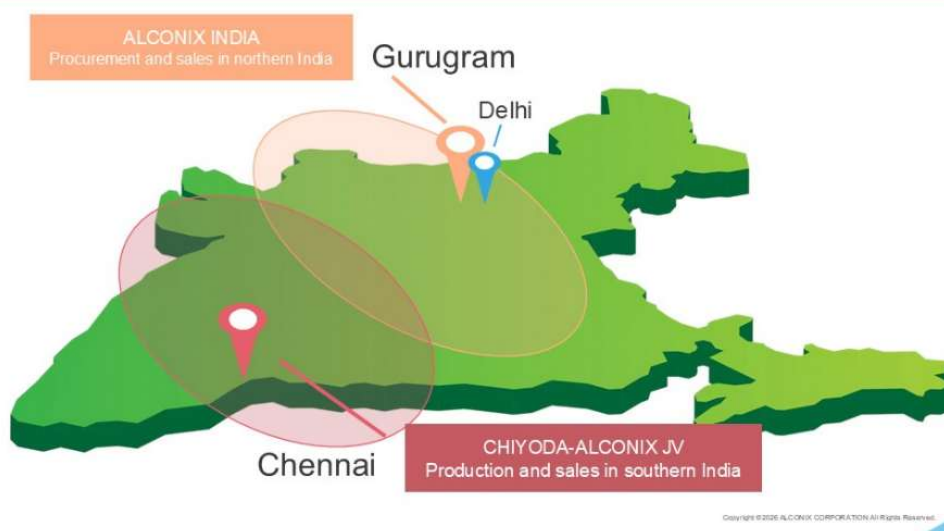

India is expected to see growth in its domestic market, backed by economic growth and the world’s largest population<sup>\*1</sup>, and also holds high strategic value as an export base to Japan and third countries (Africa and the Middle East).

ALCONIX has positioned India as a priority strategic area for the Group and has decided to establish an Indian subsidiary as a local business base. Positioning India as a manufacturing and supply base for raw materials and parts, and with a view to developing business opportunities in advanced fields such as the information industry, space, and aviation, ALCONIX will actively promote the expansion of its business in the Indian market.

Furthermore, the penetration rate of RA in India remains low at approximately 8%<sup>\*2</sup>, and significant room for growth is expected in this market against the backdrop of future economic growth. For example, it is also forecast that the number of RA in use will increase to approximately nine times the current level by 2050<sup>\*3</sup>. Accordingly, ALCONIX will establish a joint venture with CHIYODA Air-con Parts Co., Ltd. to engage in the manufacture and sale of valve products for RA and will aim to develop the market in coordination with ALCONIX’s base in India. The ALCONIX Group aims to enhance its global competitiveness and achieve sustainable growth through strengthening its business foundation in the Indian market.

Aiming to develop the Indian market through a two-base structure in the North and South, within the air conditioning and refrigeration equipment parts business, focusing on service valves for room air conditioners

## 【About the ALCONIX Group】

**Purpose (The reason for the Group's existence): Shaping a better future for someone, somewhere**

**Vision (What the Group aspires to be): Connecting people, connecting things, connecting technology**

The ALCONIX Group, under its corporate slogan “Drawing the future of our dreams,” is a comprehensive solution provider that offers non-ferrous metals essential to manufacturing—such as aluminum, copper, and rare earths—on a one-stop basis, and consists of a trading segment responsible for wholesale and distribution functions and a manufacturing segment responsible for processing and manufacturing functions. By developing its business with an eye on the next generation, the ALCONIX Group aims to create a sustainable business model in the domestic manufacturing industry and enhance competitiveness.
